

SECOLO MOBILE SAFE „S“

SECOLO Smart Locks protect your goods in transit

Mobile Safe.

Transporting valuable items safely in vehicles.

In a world in which mobility and the transportation of goods and valuables play a central role, security is of the utmost importance. Protecting against theft and unauthorized access to sensitive goods is a challenge that companies and private individuals alike must face. This is where the SECOLO security lock comes into play, which can be installed in any type of container to ensure secure and flexible storage during transportation in vehicles.

The SECOLO system is the ideal solution for individual vehicles or vehicle fleets due to its incredible scalability. The SECOLO Smart Lock allows access rights to be activated directly on the lock, eliminating the need for software. For fleets of cargo bikes, the SECOLO Management Software is used, with which all parameters and access rights can be set quickly and conveniently directly from the PC workstation. If required, a GPS tracker can also be attached so that the current position is visible and the tours are documented.

SECOLO MOBILE SAFE „S“

SECOLO Smart Locks protect your goods in transit

Simply safe.

- > Der Mobile Safe ist eine stabile Sicherheitsbox mit einem extrem sicheren elektronischen Schloss, das mit RFID-Schlüssel und/oder PIN verschlossen werden kann.
- > Unsere Schlösser können auch ohne Software über die Tastatur programmiert werden und sind somit als Stand-Alone Lösung (eine einzelne Box) einsetzbar.
- > Einfachste Handhabung: PIN-Code eingeben oder RFID-Karte bzw. Schlüsselanhänger hinhalten.
- > Hohe Sicherheit: Zugriffsrechte (vom einfachen PIN-Code bis zur RFID-Karte + PIN) sowie die Überwachung der „Deckel offen Zeit“ können eingestellt werden.
- > Das SECOLO Smart Lock verriegelt automatisch, sobald der Deckel zu ist.
- > Auf Wunsch kann die Box auch mit zwei Stahlseilen an den Verzurrösen in Ihrem Fahrzeug gesichert werden.
- > Versäumt man es, den Deckel rechtzeitig zu schließen, erfolgt eine Alarmierung.

SECOLO advantages

High level of investment security

When switching from stand-alone to the professional (networked) version, the existing existing hardware can continue to be used.

Excellent anti-theft protection
